

SK MAHBUB

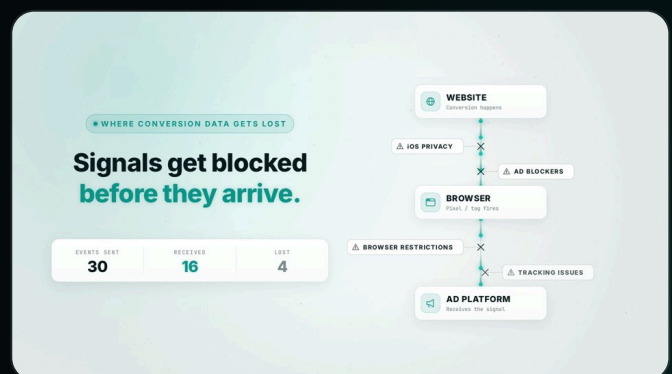

Paid Ads | Web Analytics | Conversion Tracking

Paid Ads, Web Analytics & Conversion Tracking Consultant

The source of truth for colors, type, layout, motion and audio. Attach this guide to any new video, design or content request so every piece looks like the same brand. Pick **Dark Mode** (default, matches the website) or **Light Mode** (bright and clean).

DARK MODE • 16:9

LIGHT MODE • 16:9

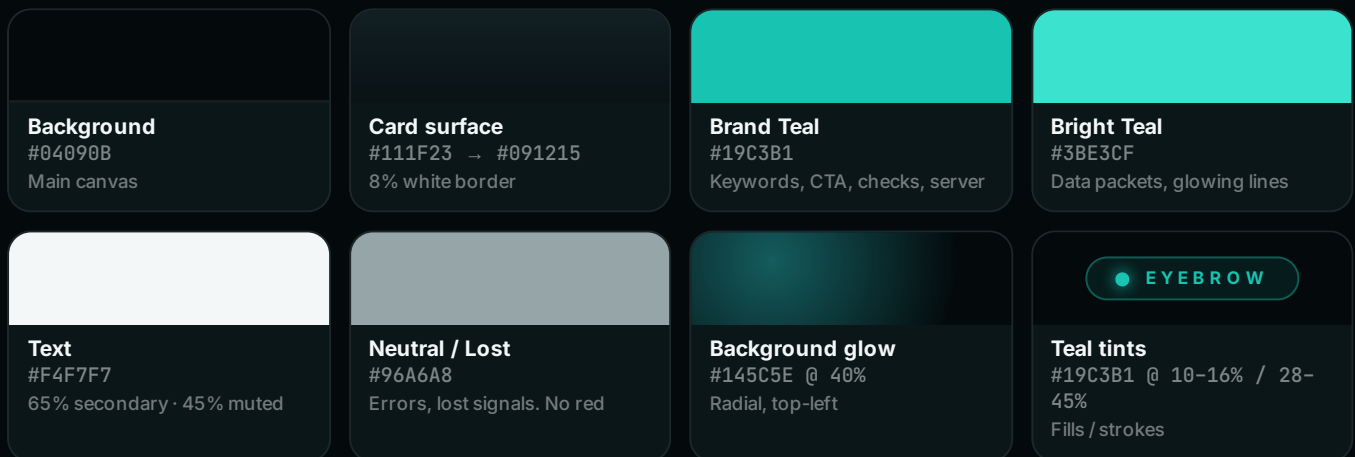

01 · BRAND BASICS

Name	SK MAHBUB (all caps in titles, letter-spaced)
Short positioning	Paid Ads Web Analytics Conversion Tracking
Full title	Paid Ads, Web Analytics & Conversion Tracking Consultant
Feel	Premium · technical · clean · trustworthy · minimal · confident
Theme	Marketing technology + data infrastructure + advertising + analytics
Never	Cartoonish, gaming, glitch-heavy, stock-explainer, flashy, cluttered

02 · DARK MODE (PRIMARY)

Matches the website

Near-black canvas, soft teal glow top-left, dark gradient cards, teal used sparingly for what matters.

Teal on bg 9.0 : 1 ✓

Text on bg 18.6 : 1 ✓

Grey on bg 7.9 : 1 ✓

CSS tokens: dark

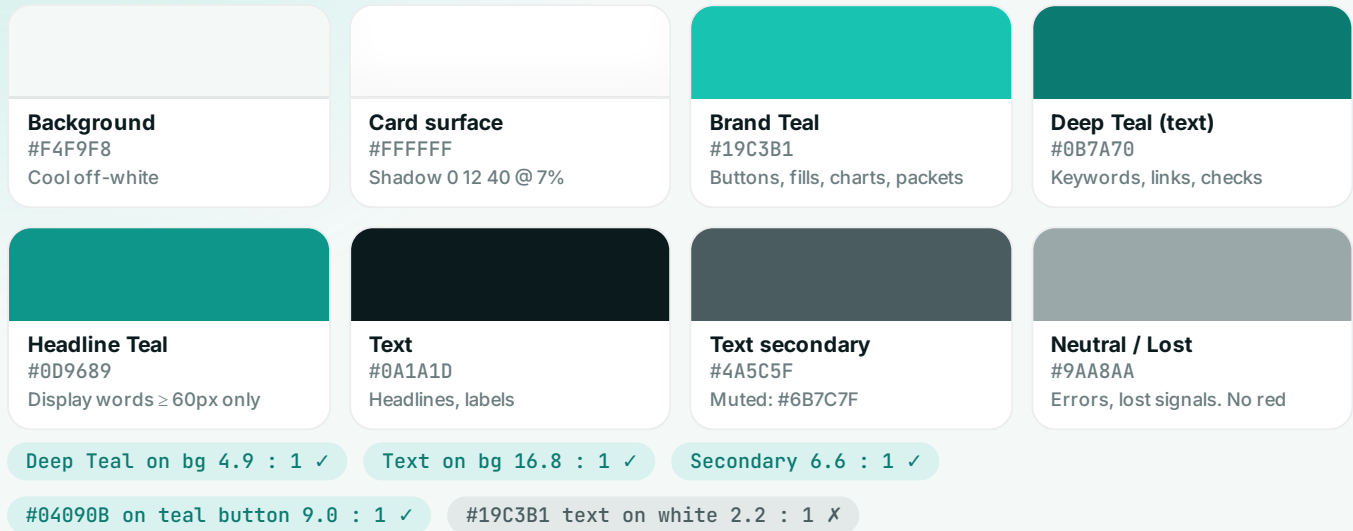

```
:root {
  --bg: #04090B;           --bg-glow: rgba(20, 92, 94, 0.42);
  --surface-1: #111F23;    --surface-2: #091215;
  --border: rgba(255, 255, 255, 0.075);
  --accent: #19C3B1;       --accent-bright: #3BE3CF;
  --accent-fill: rgba(25, 195, 177, 0.12);  --accent-stroke: rgba(25, 195, 177, 0.38);
  --text: #F4F7F7;         --text-2: rgba(244, 247, 247, 0.65);  --text-3: rgba(244, 247, 247, 0.45);
  --neutral: #96A6A8;
}
```

Same brand, bright and clean

Teal identity on an off-white canvas. White cards use soft shadows instead of glow.

Important: bright teal #19C3B1 is only 2.2 : 1 on white, so it's too light for text. Use

Deep Teal #0B7A70 for text and thin lines. Keep #19C3B1 for fills, buttons and graphics.

Running Google Ads?

Text in ink, keywords in teal.

FIX YOUR TRACKING

INTER 900 • STATEMENTS • ALL CAPS • TIGHT TRACKING

Running Facebook or Google Ads?

Inter 500–700 body & title line

SIGNAL QUALITY • 94%

INTER 800 HEADLINES • JETBRAINS MONO DATA LABELS

USE	FONT	WEIGHT	NOTES (SIZES ON A 1080-WIDE CANVAS)
Big statements	Inter	900	ALL CAPS, tracking –2 to –4px, 120–200px
Headlines	Inter	800	Sentence case, tracking –1px, 74–96px
Labels / card titles	Inter	700–800	28–52px
Body / title line	Inter	500–700	26–36px
Eyebrow labels	Inter	700	ALL CAPS, +4px spacing, 22px, teal pill with dot
Data / tech labels	JetBrains Mono	500–700	ALL CAPS, +2px spacing, 17–22px, muted

Keyword rule: only 1–3 words per line in teal. Never put the whole voice-over on screen; show key phrases, numbers and keywords only. Both fonts are free (Google Fonts / Fontsource).

05 • SHAPES & COMPONENTS

Card radius	28px large • 22–26px medium • 18–20px rows
Icon box	Rounded square (radius ≈ 28%), teal tint fill + teal stroke, line icons at 3px
Pill / eyebrow	Fully rounded, teal tint fill + stroke, optional glowing teal dot
Diagram node	Card + icon box left + bold ALL-CAPS label + mono sub-label
Server node	Larger card, teal border 55%, teal glow, pulsing rings. Always the visual hero
Data packet	6–7px teal dot with soft glow and short gradient trail
Checkmark	Teal circle draws on, then the check stroke
Lost / error	Grey, dashed outline, "?" or "x". Never red
Connectors	2.5–3px teal at 35–40%; dashed = blocked / weak
Icons	Line icons: globe, browser, server rack, target, megaphone, chart, shield, signal bars
Platforms	Plain text labels ("Google", "Meta", "TikTok") + generic icons. Never copy real UIs or logos
Depth	Dark mode = glow • Light mode = soft shadow (glow max 10–15%)

06 · LAYOUT

9:16 vertical · 1080×1920

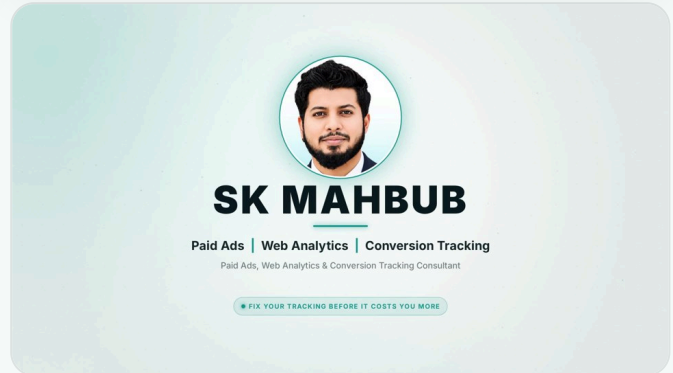

Reels / TikTok / Shorts. Keep critical content between y 220–1600, 90px side margins. Stack: eyebrow (y≈300) → headline → main visual → supporting text.

STATEMENT + MARKER HIGHLIGHT

16:9 landscape · 1920×1080

YouTube / LinkedIn / web. Text in the **left column** (x≈520), visuals on the **right** (x≈1400). Big statements and the end card are centered. Margins ~100px sides, ~80px top/bottom.

END CARD · CENTERED PHOTO

07 · MOTION LANGUAGE

- **Mask reveals:** words rise from below, staggered ~0.07s, ease-out, ~0.5s each.
- **Exits:** move up + fade + slight blur, ~0.4s. **Transitions:** soft crossfade, scale 1.03 → 1, blur out. No preset wipes or spins.
- **Camera:** slow push-ins (≈ +5% over 3s) on key moments.
- **Impacts:** 1.2 → 1 scale, soft teal radial flash, tiny shake. Only on the 1–2 strongest lines.
- **Highlight marker:** a teal box sweeps behind the key word, which pops and turns dark.
- **Data:** packets flow continuously; lost packets turn grey, drift sideways, fade.
- **Glitch:** max ~0.15s, one-off, only on "WRONG" / "DATA LOSS"-type words.
- **Pace:** a change every 2–4s. Faster for problems, slower for solution, intro and CTA. **The voice sets the timing.**

08 · AUDIO

- **Voice:** always the original recording. Clean-up only (high-pass, light denoise, EQ, de-ess, light compression, loudness match). No AI voice, cloning or pitch/tone change.
- **Music:** minimal premium tech bed (e.g. D minor, ~100 BPM, airy pads, soft pluck arpeggio). About 18 dB under the voice, ducked while speaking. Builds into the solution, dips before the hardest line, resolves on the CTA.
- **SFX:** subtle UI ticks, blips, confirm chimes, soft whooshes, low impacts. No sci-fi alarms.
- **Master:** -14 LUFS integrated, true peak ≤ -1 dBTP.

09 · MESSAGING

Say

- More reliable tracking
- Less data loss
- Better signals
- Stronger tracking infrastructure
- Better data quality

Never say

- 100% tracking
- Zero data loss
- Perfect attribution
- Every conversion captured
- Generic "Book a call / DM me" (unless asked)

CTA: the final statement *is* the CTA, e.g. "FIX YOUR TRACKING BEFORE IT COSTS YOU MORE." **End card:** centered portrait → SK MAHBUB → teal underline → Paid Ads | Web Analytics | Conversion Tracking → full title.

10 · PORTRAIT RULES

Allowed

- Framing: rounded card or circle
- Slow zoom / parallax, mask reveal
- Edge fade into background
- Teal border / glow

Not allowed

- Face edits or reshaping
- AI restyling / replacement
- Heavy filters on the face
- Using another person's likeness

11 · COPY-PASTE BRIEF

Use my brand: **SK Mahbub, Paid Ads | Web Analytics | Conversion Tracking.**

Dark mode: background #04090B with a soft teal glow (#145C5E), cards #111F23 – #091215 with 8% white borders, accent teal #19C3B1 (bright #3BE3CF for data), text #F4F7F7, neutral grey #96A6A8 for lost/error states (no red).

Light mode: background #F4F9F8, white cards with soft shadow, accent teal #19C3B1 for fills/buttons, deep teal #0B7A70 for text (#0D9689 for large headlines), text #0A1A1D / #4A5C5F.

Fonts: Inter (800–900 headlines, ALL-CAPS statements) + JetBrains Mono for data labels.

Style: premium data-infrastructure look, rounded cards (28px), line icons in teal icon boxes, teal eyebrow pills, mask-reveal kinetic type, data-packet flows, server as the visual hero.

Use my original voice (clean-up only), my real portrait (no edits), and no absolute tracking claims.
