

Schlafstörungen Zürich

A lead-generation Search campaign for the AVWF® Neurostimulation sleep treatment programme at Praxis House of Rouh.

CONTENTS

01	Landing Page Analysis	Programme, audience, problems, USPs, conversion intent, prohibited language
02	Topic Selection	The two chosen topics, and what was rejected
03	Campaign Structure & Settings	Every setting, with the reasoning behind it
04	Targeting Considerations	Geography, language, device, policy
05	Ad Group 1 — Schlafstörungen Behandlung Zürich	Keywords, 15 headlines, 4 descriptions, CTA, negatives, intent map
06	Ad Group 2 — Schlaftherapie ohne Medikamente	Keywords, 15 headlines, 4 descriptions, CTA, negatives, intent map
07	Shared Negative Keyword List	Campaign-level list, plus the negatives that would cost you patients
08	Conversion Goal & Lead Tracking	Primary and secondary actions, de-duplication, implementation
09	Campaign Assets	Sitelinks, callouts, structured snippets, call, location, images
10	Pre-Launch Requirements & Checklist	Landing-page fixes, open questions, full QA checklist
—	Appendix	Copy-paste build blocks

CLIENT	Praxis House of Rouh · Kanzleistrasse 4, 8004 Zürich (am Stauffacher)
LANDING PAGE	www.houseofrouh.ch/therapien/schlafstoerungen
SERVICE	AVWF® Neurostimulation — sleep disorder treatment programme
PRACTITIONER	Martin Beer, MSc Clinical Optometry, FAAO, Neurowissenschaftler
CAMPAIGN TYPE	Google Search · Leads objective
MARKET / LANGUAGE	City of Zürich, Switzerland · ad copy in German
STRUCTURE	1 campaign · 2 ad groups · 4 responsive search ads
OPTIMISED FOR	Qualified appointment enquiries — not click volume
SOURCE VERIFICATION	Landing page and all linked pages fetched and parsed live, 17.09.2026. Every claim in this plan traces to on-page wording. All assets character-validated.

SECTION 01

Landing Page Analysis

The page sells one thing: a non-invasive, medication-free sleep treatment programme, entered through a free initial consultation. Everything in this campaign is built backwards from that sentence.

1.1 The treatment programme

AVWF® Neurostimulation, presented on the page as *"Schlafstörungen – Behandlungsprogramm"*. Specially modulated sound signals are delivered through precisely calibrated therapy headphones. The page is explicit that these are *"keine Entspannungsmusik, sondern gezielte Impulse"*. The signals act via the fine muscles of the inner ear and the cranial nerves originating there, reaching the regulatory circuits that govern the switch between wakefulness and rest.

The stated sequence: *"zuerst die Überaktivierung senken, dann den beruhigenden Vagustonus aufbauen, zuletzt die Belastbarkeit festigen."* The page positions the therapy as working on the nervous system itself rather than on symptoms — *"nicht mit Schlafmitteln oder gegen die Symptome, sondern direkt am Nervensystem selbst"* — and describes it as **nicht invasiv und medikamentenfrei**.

THE THREE PACKAGES (VERBATIM)

PACKAGE	DESCRIPTION ON THE PAGE
AVWF Remote Self-Care	Das standardisierte Schlaf-Programm für zu Hause – flexibel und selbstständig durchgeführt, wann und wo Sie wollen.
AVWF Remote Custom	Ihr individuelles Schlaf-Therapieprogramm für zu Hause – erstellt auf Basis unserer neurofunktionellen Diagnostik und Grundlagenmessung.
AVWF Premium	Das individuelle Schlaf-Therapieprogramm mit 10 Stunden in der Praxis – mit durchgehender Betreuung, laufender Anpassung sowie ergänzendem Visualtraining und Farblichttherapie.

1.2 The problems the page names

GERMAN (VERBATIM FROM THE PAGE)	ENGLISH
Stundenlang wach liegen	Lying awake for hours
Gedankenkarussell, das sich nicht stoppen lässt	A racing mind that will not stop
Nachts aufwachen und nicht mehr einschlafen	Waking at night and not getting back to sleep
Morgens wie gerädert aufstehen	Waking up exhausted
Das Nervensystem kann abends nicht vom Aktivierungs- in den Ruhemodus umschalten	The nervous system cannot switch from activation to rest mode in the evening
Das erhöhte Stresshormon Cortisol verhindert die Tiefschlafphasen	Elevated cortisol prevents deep-sleep phases
Teufelskreis aus Anspannung und Schlaflosigkeit	A vicious cycle of tension and insomnia
Konzentration, Stimmung und Belastbarkeit leiden Tag für Tag	Concentration, mood and resilience suffer day after day

1.3 Target audience

Adults in Zurich with **chronic, self-identified sleep problems** who have already tried the obvious routes. The page tells you this directly: it positions AVWF as the foundation that makes everything else work — *"Erst wenn das Nervensystem zur Ruhe findet, können Schlafhygiene, ärztliche Behandlung oder Entspannungsverfahren ihre volle Wirkung entfalten."* That sentence is written for someone who has already tried sleep hygiene, or medication, or both, and is still awake at 3 a.m.

Secondary overlap, confirmed on the practice page: stress, Erschöpfung, Burnout, ADHS. The practice treats children as well as adults, but this page is written for adults.

1.4 Benefits the page claims (and only these)

Listed on the page under *"Die Wirkung"*: schnelleres Einschlafen · das Gedankenkarussell kommt zur Ruhe · ruhigeres Durchschlafen mit weniger nächtlichem Erwachen · tieferer, erholsamer Schlaf und echte nächtliche Regeneration · erholt es Aufwachen und mehr Energie über den Tag · der Teufelskreis aus Anspannung und Schlaflosigkeit wird durchbrochen.

1.5 Unique selling points

USP	EVIDENCE ON THE PAGE
Free initial consultation	"Vereinbaren Sie ein kostenloses Erstgespräch" — the single strongest lead hook available.
Medication-free, non-invasive	"Nicht invasiv und medikamentenfrei." Repeated: "arbeitet nicht mit Schlafmitteln".
Treats the cause, not the symptom	"direkt am Nervensystem selbst, dort, wo der Schlaf reguliert wird."
Real choice of format	Three packages: at home, individualised at home, or 10 hours in the practice.
Named, credentialed practitioner	Martin Beer, MSc Clinical Optometry, FAAO, Neurowissenschaftler — with photo and direct contact.
Central Zurich location	Kanzleistrasse 4, 8004 Zürich, am Stauffacher. Page title already carries the location.
Patient testimonials	Linked page with named cases covering fatigue, stress, depression, concentration, tinnitus.

1.6 Conversion intent — what a visitor can actually do

#	ACTION AVAILABLE ON THE PAGE	DETAIL
1	Phone	tel:+41433222200 — three instances (header bar, expert card, footer)
2	Email	mailto:welcome@houseofrouh.ch — three instances, including the expert-card button
3	Contact form	Footer form: Vorname, Nachname, E-Mail, Telefon, Nachricht → "Nachricht senden"
4	"BUCHEN" button	Header → /online-buchen. See the finding below.

CRITICAL FINDING — AVWF CANNOT BE BOOKED ONLINE

On **/online-buchen**, four therapies (Augenuntersuchung, Longevity Medizin, Physiotherapie, TCM) each have a working *"Online buchen"* button. **AVWF Neurostimulation has only a phone number and an "E-Mail schreiben" link.** This has two direct consequences for the campaign:

- The conversion goal **cannot** be "booking completed". It must be contact intent — call, form, email.
- The header "BUCHEN" button is a dead end for exactly the visitor this campaign sends. Fix before launch (Section 10).

SCOPE CORRECTION

This programme is **not physiotherapy**. Physiotherapie is a separate service at the same practice, delivered by a different practitioner (Danijela Campbell). Writing physiotherapy-led ads against this page would break keyword-to-page relevance and waste budget. The campaign in this document targets the neurostimulation sleep programme only.

1.7 Language that may NOT be used

DO NOT USE	REASON
Physiotherapie (for this page)	Different service, different practitioner
Schlaflabor, Polysomnographie, Schlafmedizin, Somnologie	Not offered; implies diagnostic sleep laboratory
Schlafapnoe, CPAP, Narkolepsie, Restless Legs	Never mentioned; regulated clinical conditions
CBT-I / KVT-I, Hypnose, Schlafcoaching	Not the method used
Heilung, geheilt, garantiert, 100 %, beste, schnellste	Unsupported and against Google Ads policy in spirit
"Von der Krankenkasse übernommen"	Unverified. The FAQ answer is loaded dynamically and could not be read. Confirm with the practice before any use.
Any price, "ab CHF..."	No prices published anywhere on the site
"20 Jahre Erfahrung, tausende Patienten"	Appears on /avwf, not on this landing page. Confirm before using.
Arzt, ärztliche Behandlung	Martin Beer is an optometrist and neuroscientist, not a physician
Phone numbers in ad text	Prohibited by Google Ads editorial policy. Use the call asset instead.

SECTION 02

Topic Selection

Two topics were selected from the page's own positioning. Both were chosen for lead quality, not search volume.

2.1 The two selected topics

TOPIC 1 — SLEEP DISORDER TREATMENT IN ZURICH

The searcher: someone who has already named their problem as a condition and is now looking for a provider who treats it, near them.

Query shape: *schlafstörungen behandlung zürich · schlaftherapie zürich · hilfe bei schlafstörungen · schlafstörungen spezialist zürich*

Why it is the strongest topic: the transition from "I sleep badly" to "Schlafstörungen behandeln" is the moment someone accepts they need professional help. That is the highest commercial intent available in this market. It also matches the page perfectly at every level — the H1 is literally *Schlafstörungen*, the section heading is *Schlafstörungen – Behandlungsprogramm*, and the title tag already reads *Schlafstörungen in Zürich Stauffacher*.

TOPIC 2 — SLEEP THERAPY WITHOUT MEDICATION

The searcher: someone who has already rejected or exhausted sleeping pills and is actively hunting for a drug-free alternative.

Query shape: *schlafstörungen ohne medikamente · alternative zu schlafmitteln · medikamentenfreie schlaftherapie · neurostimulation schlaf*

Why it is the strongest differentiator: this is the page's central promise, stated twice in its own words. These searchers arrive **pre-qualified against the main objection** — they have already decided they do not want pills, which is precisely what this programme is not. Volume is lower than Topic 1, but intent-to-enquire is the highest in the account, and there is far less competition from pharmacies and general practices on these terms.

2.2 What was considered and deliberately rejected

CANDIDATE TOPIC	VERDICT	REASONING
Symptom-led nicht einschlafen können, durchschlafprobleme, gedankenkarussell	REJECTED	Highest volume of the three, but heavily contaminated with research intent — people looking for tips, apps, sleep music and home remedies, not a paid therapy programme. At a disciplined budget this topic buys traffic, not leads. Hold for Phase 2 once the two selected topics have proven their cost per enquiry.
Stress / burnout led burnout therapie zürich, erschöpfung behandlung	REJECTED	The practice genuinely treats these, but the landing page is a sleep page. Sending burnout searchers here breaks message match, and they belong on /avwf-erwachsene in their own campaign.
Brand / method led avwf, avwf neurostimulation	FOLDED IN	Too little standalone volume to justify its own ad group. Folded into Topic 2, where the method <i>is</i> the message.
Sleep clinic / diagnostics schlaflabor zürich, schlafmedizin	EXCLUDED	The practice does not offer sleep laboratory diagnostics. These searches cannot convert and are added as negatives.

WHY TWO AD GROUPS AND NOT FIVE

Search volume for sleep-therapy terms inside the City of Zurich is modest. Splitting it across five ad groups starves each one of impressions, delays learning, and makes Quality Score data unreadable for months. Two tightly themed ad groups concentrate the data, keep ad-to-keyword relevance very high, and remain manageable for a non-technical operator. This is a deliberate choice, not a simplification.

SECTION 03

Campaign Structure & Settings

3.1 Structure at a glance

CAMPAIGN	Search ZH Schlafstörungen DE
↳ AD GROUP 1	Schlafstörungen Behandlung Zürich — 18 keywords, 2 RSAs
↳ AD GROUP 2	Schlaftherapie ohne Medikamente — 15 keywords, 2 RSAs
↳ SHARED NEGATIVES	NEG Schlafstörungen ZH — applied at campaign level
↳ ASSETS	5 sitelinks · 12 callouts · 2 structured snippets · call · location · images
↳ CONVERSION GOAL	Terminanfrage — 3 primary actions

3.2 Recommended settings

SETTING	RECOMMENDATION	WHY
Campaign name	Search ZH Schlafstörungen DE	Network, location, theme, language. Scales when other therapies are added.
Objective	Leads	Unlocks the correct conversion-goal setup. If the guided flow hides settings, use "Create a campaign without a goal's guidance" instead.
Campaign type	Search	Intent-driven. People type their sleep problem into Google.
Networks	Google Search only. Search Partners OFF. Display Network OFF.	Display on a Search campaign routinely consumes 20–40 % of budget on untargeted placements. Both are ticked by default — untick them.
Location	Zürich (City), Zurich, Switzerland	See Section 4.
Location option	Presence — people in or regularly in your included locations	Excludes people merely <i>interested</i> in Zurich. Non-negotiable for a physical practice.
Language	German + English	The keywords are German, so the keyword does the real filtering. Adding English captures Zurich expats whose Google interface is English but who search in German.
Bidding — weeks 1–3	Maximize Clicks with a max. CPC limit of CHF 4.00	There is no conversion history. Smart bidding without data overspends. The cap prevents Google buying CHF 12 clicks.
Bidding — week 4+	Maximize Conversions, once ≥15–30 conversions in 30 days. Target CPA only after that.	Smart bidding below that threshold performs worse than Maximize Clicks. Never start on tCPA.

Daily budget	CHF 40/day ($\approx$ CHF 1'200/month). Range CHF 35-50.	<i>Estimate:</i> Swiss local healthcare CPCs typically run CHF 2.50-5.00, so roughly 8-15 clicks/day — enough to gather search-term data in two weeks. Do not exceed CHF 50 until the landing-page fixes in Section 10 are live.
Ad schedule	All days, all hours for the first 14 days. Restrict the <i>call asset</i> to practice opening hours.	Form and email work 24/7; an unanswered phone at 22:00 is wasted spend. Opening hours are not published — obtain from the practice.
Audiences	None. If added, Observation only — never Targeting.	Google's personalized advertising policy restricts audience targeting based on health conditions. Keyword targeting on Search is unaffected. Do not build remarketing lists from this page for personalized targeting.
Ad rotation	Optimize	Lets Google find the winning RSA combination.
Auto-apply recommendations	OFF	Otherwise Google will silently add broad match and Display expansion to a healthcare campaign.
Final URL	https://www.houseofrouh.ch/therapien/schlafstoerungen (identical for both ad groups)	One page, perfectly matched to both topics. Do not send Topic 2 to /avwf — that page leads with ADHS and burnout and buries sleep.
Final URL suffix	utm_source=google&utm_medium=cpc&utm_campaign=zh_schlafstoerungen&utm_term={keyword}&utm_content={creative}	

SECTION 04

Targeting Considerations

4.1 Geographic targeting

DECISION	RECOMMENDATION
Target	Zürich, Zurich, Switzerland — the entry labelled <i>City</i> . Not Canton, not "Switzerland".
Location option	Presence (target), Presence (exclude). Change this manually — Google does not always default to it.
Radius at launch	No. At CHF 40/day you cannot test two variables at once. Prove city traffic converts first.
Exclusions at launch	None. The City target simply does not include the surrounding municipalities, so excluding them is redundant.
Phase 2 (week 4+)	If city traffic converts, add a 10 km radius around Kanzleistrasse 4, 8004 Zürich as a second location. That covers Schlieren, Opfikon, Zollikon, Kilchberg, Adliswil — roughly 20 minutes by car or S-Bahn, the honest catchment for a programme requiring 10 in-practice hours. Do not exceed 15 km; beyond that, travel friction kills attendance.

EXACTLY WHERE TO SET THIS

Campaigns → select the campaign → **Settings** → expand **Locations** → *Enter another location* → type Zürich → select the result labelled **Zürich, Zurich, Switzerland — City → Target**. Delete any pre-filled "Switzerland" entry. Then click **Location options** directly beneath the box and set *Target* to **Presence: People in or regularly in your included locations**.

To verify after launch: **Insights and reports** → **When and where ads showed** → **Locations**. Check this on day 7. Clicks from outside Zurich mean the Presence setting reverted.

4.2 Language and market considerations

- **Write in standard German.** Swiss German is spoken, not typed. Zurich users search in standard German.
- **Swiss orthography:** use *ss*, never *ß*. All copy in this document complies.
- **Umlaut variants** (*zuerich*, *schlafstoerungen*) are handled automatically by Google's close-variant matching. No separate keywords needed.
- **Tone:** the landing page is calm, precise and clinical — not emotive or salesy. The ad copy matches that register deliberately. A hype-heavy ad against this page would convert worse, not better.

4.3 Device considerations

Expect 55–70 % mobile traffic for a health search in this market. Mobile users will predominantly tap the call asset rather than fill in the footer form. This is the reason the call asset is treated as a primary conversion in Section 8, and the reason the above-the-fold CTA fix in Section 10 is classified as blocking.

4.4 Policy considerations

- **No phone numbers in ad text.** Google editorial policy prohibits them in headlines, descriptions and sitelink descriptions. All copy in this document complies — use the call asset.
- **Healthcare vertical:** ads may occasionally be caught by the automated healthcare filter. If an ad shows *Disapproved*, read the stated policy and appeal. No special certification is required for this type of practice.
- **No health-based audience targeting** (see Section 3.2).
- **No unsupported claims** anywhere: no cure, no guarantee, no superlative, no insurance claim, no price.

SECTION 05

Ad Group 1 — Schlafstörungen Behandlung Zürich

AD GROUP NAME	Schlafstörungen Behandlung Zürich
TOPIC	Condition-named searches for treatment, with local intent — the highest commercial-intent segment in this market.
SEARCHER MINDSET	"I have a sleep disorder. I need someone in Zurich who treats it."
FINAL URL	https://www.houseofrouh.ch/therapien/schlafstoerungen
DISPLAY PATH	/Schlafstoerungen /Zuerich
PRIMARY CTA	"Kostenloses Erstgespräch vereinbaren" — free initial consultation, explicitly offered on the page.

5.1 Keywords

KEYWORD	ENGLISH	MATCH	PRIORITY	INTENT
[schlafstörungen zürich]	sleep disorders zurich	Exact	HIGH	Commercial, local
[schlafstörungen behandlung]	sleep disorder treatment	Exact	HIGH	Commercial
[schlafstörungen behandeln]	to treat sleep disorders	Exact	HIGH	Commercial
[schlaftherapie zürich]	sleep therapy zurich	Exact	HIGH	Commercial, local
[schlafprobleme behandlung]	sleep problem treatment	Exact	MEDIUM	Commercial
"schlafstörungen behandlung zürich"	sleep disorder treatment zurich	Phrase	HIGH	Commercial, local
"hilfe bei schlafstörungen"	help with sleep disorders	Phrase	HIGH	Solution-seeking
"hilfe bei schlafstörungen zürich"	help with sleep disorders zurich	Phrase	HIGH	Solution-seeking, local
"therapie bei schlafstörungen"	therapy for sleep disorders	Phrase	HIGH	Commercial
"behandlung von schlafstörungen"	treatment of sleep disorders	Phrase	MEDIUM	Commercial
"chronische schlafstörungen behandlung"	chronic sleep disorder treatment	Phrase	HIGH	Commercial, qualified
"chronische schlafstörungen zürich"	chronic sleep disorders zurich	Phrase	MEDIUM	Commercial, local
"schlafstörungen praxis zürich"	sleep disorder practice zurich	Phrase	HIGH	Provider-seeking
"praxis für schlafstörungen"	practice for sleep disorders	Phrase	MEDIUM	Provider-seeking
"schlafstörungen spezialist zürich"	sleep disorder specialist zurich	Phrase	HIGH	Ready to enquire
"schlaftherapeut zürich"	sleep therapist zurich	Phrase	HIGH	Ready to enquire
"schlafberatung zürich"	sleep consultation zurich	Phrase	MEDIUM	Ready to enquire
"erstgespräch schlafstörungen"	initial consultation sleep disorders	Phrase	MEDIUM	Ready to enquire

No broad match. At this budget, broad match spends the day's budget on "einschlafmusik" before lunch.

5.2 Responsive Search Ad 1A — keyword & booking led

15 HEADLINES (limit 30 characters — all verified)

#	GERMAN HEADLINE	ENGLISH MEANING	CHARS
1	Schlafstörungen Zürich	Sleep disorders Zurich	22
2	Schlafstörungen behandeln	Treat sleep disorders	25
3	Therapie bei Schlafstörungen	Therapy for sleep disorders	28
4	Schlaftherapie in Zürich	Sleep therapy in Zurich	24
5	Schlafstörungen Behandlung	Sleep disorder treatment	26
6	Behandlungsprogramm Schlaf	Sleep treatment programme	26
7	Endlich wieder durchschlafen	Finally sleep through the night again	28
8	Gedankenkarussell beruhigen	Calm the racing mind	27
9	AVWF Neurostimulation	AVWF neurostimulation	21
10	Praxis am Stauffacher	Practice at Stauffacher	21
11	Nicht invasiv behandeln	Treat non-invasively	23
12	Kostenloses Erstgespräch	Free initial consultation	24
13	Jetzt Erstgespräch sichern	Secure your initial consultation now	26
14	Termin in Zürich anfragen	Request an appointment in Zurich	25
15	Drei Therapiepakete zur Wahl	Three therapy packages to choose from	28

4 DESCRIPTIONS (limit 90 characters — all verified)

#	GERMAN DESCRIPTION	ENGLISH MEANING	CHARS
1	Schlafstörungen gezielt behandeln - mit AVWF Neurostimulation in Zürich. Jetzt anfragen.	Treat sleep disorders specifically — with AVWF neurostimulation in Zurich. Enquire now.	88
2	Nicht invasiv und medikamentenfrei. Persönliche Beratung in der Praxis am Stauffacher.	Non-invasive and medication-free. Personal consultation at the practice at Stauffacher.	86
3	Kostenloses Erstgespräch: Wir klären, welches der drei Schlafprogramme zu Ihnen passt.	Free initial consultation: we clarify which of the three sleep programmes suits you.	86
4	Endlich wieder durchschlafen und erholt aufwachen. Jetzt Erstgespräch vereinbaren.	Finally sleep through and wake refreshed. Arrange your initial consultation now.	82

PINNING — AD 1A

Pin **headlines 1, 2 and 3 to Position 1**. Nothing else. Pinning a *pool of three* guarantees the searcher's own term appears first — the strongest single driver of CTR and Ad Relevance — while still letting Google test within the pool. Ad Strength is only penalised heavily when a single asset is pinned per position. Do not pin descriptions; all four work in either slot.

5.3 Responsive Search Ad 1B — control ad

Create a second RSA in this ad group using the **same 15 headlines and 4 descriptions**, with **no pinning at all**. After 30 days, compare CTR and conversion rate between 1A and 1B. This isolates the effect of pinning in your account and tells you whether to pin across the rest of the account. Keep everything else identical — one variable at a time.

5.4 Ad-group negative keywords

Routing negatives — keep the "without medication" theme in Ad Group 2 where the ad copy matches it:

```
"ohne medikamente"
"ohne schlafmittel"
"alternative zu schlafmitteln"
avwf
```

Theme-specific negatives — condition-named searches attract diagnostic and encyclopaedic intent that this practice cannot serve:

```
schlaflabor
schlafmedizin
polysomnographie
"schlafstörungen test"
"schlafstörungen fragebogen"
"schlafstörungen icd"
"schlafstörungen arten"
"formen von schlafstörungen"
```

All general negatives (jobs, products, apps, videos, unrelated conditions) sit in the shared campaign-level list in Section 7 — maintained in one place rather than duplicated per ad group.

5.5 Intent alignment — keyword → ad → landing page → conversion

SEARCH QUERY	"schlafstörungen behandlung zürich"
↓ KEYWORD	[schlafstörungen behandlung] · "schlafstörungen behandlung zürich"
↓ HEADLINE (POS. 1)	"Schlafstörungen behandeln" + "Schlaftherapie in Zürich"
↓ DESCRIPTION	"Schlafstörungen gezielt behandeln – mit AVWF Neurostimulation in Zürich."
↓ LANDING PAGE	H1 <i>Schlafstörungen</i> · H2 <i>Schlafstörungen – Behandlungsprogramm</i> · title tag <i>Schlafstörungen in Zürich Stauffacher</i>
↓ PAGE SECTION	"Wenn der Körper nachts nicht zur Ruhe kommt" → "Unsere Therapiepakete"
↓ CTA	Kostenloses Erstgespräch vereinbaren
↓ CONVERSION	Terminanfrage — form submit · phone click · call from ad

The chain uses the landing page's own vocabulary at every step. That is the entire mechanism behind Ad Relevance and Landing Page Experience — there is no trick beyond it.

SECTION 06

Ad Group 2 — Schlaftherapie ohne Medikamente

AD GROUP NAME	Schlaftherapie ohne Medikamente
TOPIC	Drug-free sleep treatment — the page's central differentiator, stated twice in its own words.
SEARCHER MINDSET	"I don't want sleeping pills. What else actually works?"
FINAL URL	https://www.houseofrouh.ch/therapien/schlafstoerungen
DISPLAY PATH	/Schlaftherapie /Ohne-Medikamente
PRIMARY CTA	"Jetzt kostenloses Erstgespräch anfragen" — framed as finding out which of the three programmes fits.

6.1 Keywords

KEYWORD	ENGLISH	MATCH	PRIORITY	INTENT
[schlafstörungen ohne medikamente]	sleep disorders without medication	Exact	HIGH	Solution-aware
[schlaftherapie ohne medikamente]	sleep therapy without medication	Exact	HIGH	Solution-aware
[avwf]	method / brand term	Exact	MEDIUM	Method-aware
"schlafstörungen ohne medikamente"	sleep disorders without medication	Phrase	HIGH	Solution-aware
"schlafstörungen behandeln ohne medikamente"	treat sleep disorders without medication	Phrase	HIGH	Very high intent
"schlafstörungen ohne schlafmittel"	sleep disorders without sleeping pills	Phrase	HIGH	Solution-aware
"alternative zu schlafmitteln"	alternative to sleeping pills	Phrase	HIGH	Actively comparing
"alternative zu schlaftabletten"	alternative to sleeping tablets	Phrase	MEDIUM	Actively comparing
"medikamentenfreie schlaftherapie"	medication-free sleep therapy	Phrase	MEDIUM	Solution-aware
"schlafstörungen natürlich behandeln"	treat sleep disorders naturally	Phrase	MEDIUM	Solution-aware — watch closely
"neurostimulation schlaf"	neurostimulation sleep	Phrase	MEDIUM	Method-aware
"avwf neurostimulation"	AVWF neurostimulation	Phrase	MEDIUM	Method-aware
"avwf therapie zürich"	AVWF therapy zurich	Phrase	MEDIUM	Method-aware, local
"schlafstörungen nervensystem"	sleep disorders nervous system	Phrase	MEDIUM	Mechanism-aware
"nervensystem beruhigen therapie"	therapy to calm the nervous system	Phrase	LOW	Mechanism-aware

Watch flag: "schlafstörungen natürlich behandeln" captures the right anti-medication mindset but also attracts herbal-remedy shoppers. The ad-group negatives in 6.4 protect it. Review its search terms weekly for the first month; pause it if the terms are dominated by teas, drops and supplements.

6.2 Responsive Search Ad 2A — differentiator led

15 HEADLINES (limit 30 characters — all verified)

#	GERMAN HEADLINE	ENGLISH MEANING	CHARS
1	Schlaf ohne Medikamente	Sleep without medication	23
2	Therapie ohne Medikamente	Therapy without medication	25
3	Alternative zu Schlafmitteln	Alternative to sleeping pills	28
4	Medikamentenfreie Therapie	Medication-free therapy	26
5	Ohne Schlafmittel behandeln	Treat without sleeping pills	27
6	Nicht invasive Therapie	Non-invasive therapy	23
7	Am Nervensystem ansetzen	Work at the nervous system	24
8	Ursache statt Symptome	Cause instead of symptoms	22
9	AVWF Neurostimulation Zürich	AVWF neurostimulation Zurich	28
10	Schlafprogramm für zu Hause	Sleep programme for at home	27
11	10 Stunden in der Praxis	10 hours at the practice	24
12	Kostenloses Erstgespräch	Free initial consultation	24
13	Jetzt Beratung anfragen	Request a consultation now	23
14	Schlafstörungen behandeln	Treat sleep disorders	25
15	Praxis in Zürich Stauffacher	Practice in Zurich Stauffacher	28

4 DESCRIPTIONS (limit 90 characters — all verified)

#	GERMAN DESCRIPTION	ENGLISH MEANING	CHARS
1	Schlafstörungen behandeln - nicht invasiv, medikamentenfrei, direkt am Nervensystem.	Treat sleep disorders — non-invasive, medication-free, directly at the nervous system.	84
2	Keine Schlafmittel, kein Kampf gegen Symptome. AVWF Neurostimulation in Zürich.	No sleeping pills, no fighting symptoms. AVWF neurostimulation in Zurich.	79
3	Programm für zu Hause oder 10 Stunden in der Praxis. Wir beraten Sie persönlich.	Programme for at home or 10 hours at the practice. We advise you personally.	80
4	Unsicher, welches Programm passt? Jetzt kostenloses Erstgespräch vereinbaren.	Unsure which programme fits? Arrange a free initial consultation now.	77

PINNING — AD 2A

Pin headlines 1, 2 and 3 to Position 1. These carry the exact differentiator the searcher typed ("ohne Medikamente", "Alternative zu Schlafmitteln"). Everything else rotates freely. No description pinning.

6.3 Responsive Search Ad 2B — control ad

Same 15 headlines and 4 descriptions, no pinning. Same rationale as Ad 1B — a clean 30-day read on whether pinning helps in this account.

6.4 Ad-group negative keywords

Routing negatives — keep condition-named local searches in Ad Group 1:

[schlafstörungen zürich]
[schlafstörungen behandlung]
[schlaftherapie zürich]

"schlafstörungen spezialist"
"schlaftherapeut zürich"

Theme-specific negatives — "without medication" searches attract supplement and home-remedy shoppers who will never book a therapy programme:

hausmittel
melatonin
baldrian
lavendel
cbd
globuli
homöopathie
pflanzlich
"pflanzliche mittel"
rezeptfrei
"welches mittel"
schlaftee
teemischung
tropfen
kapseln

6.5 Intent alignment — keyword → ad → landing page → conversion

SEARCH QUERY	"schlafstörungen ohne medikamente"
↓ KEYWORD	[schlafstörungen ohne medikamente] · "alternative zu schlafmitteln"
↓ HEADLINE (POS. 1)	"Therapie ohne Medikamente" + "Alternative zu Schlafmitteln"
↓ DESCRIPTION	"Schlafstörungen behandeln – nicht invasiv, medikamentenfrei, direkt am Nervensystem."
↓ LANDING PAGE	"Nicht invasiv und medikamentenfrei." · "arbeitet nicht mit Schlafmitteln oder gegen die Symptome"
↓ PAGE SECTION	"Wie funktioniert AVWF® bei Schlafproblemen?" → "Unsere Therapiepakete"
↓ CTA	Jetzt kostenloses Erstgespräch anfragen
↓ CONVERSION	Terminanfrage — form submit · phone click · call from ad

This ad group has the tightest message match in the account: the searcher's objection ("not pills") is the landing page's opening claim. Expect the higher conversion rate of the two ad groups, at lower volume.

SECTION 07

Shared Negative Keyword List

Build this once as a shared list: **Tools → Shared library → Negative keyword lists → +**, name it NEG | Schlafstörungen ZH, paste the block below, then **Apply to campaigns**. Maintaining it in one place beats duplicating 180 terms across two ad groups.

No brackets or quotes = negative broad (blocks any query containing that word). "-" = negative phrase. [...] = negative exact.

DO NOT ADD THESE — THEY WOULD BLOCK QUALIFIED PATIENTS

TEMPTING NEGATIVE	WHAT IT WOULD DESTROY
kostenlos, gratis	The free initial consultation <i>is</i> the offer. These would block your best converting queries.
medikamente, schlafmittel, tabletten (broad/phrase)	Blocks the entire Ad Group 2 keyword set. Use exact-match product negatives only, as listed above.
ohne	Blocks every "ohne Medikamente" query.
kind, kinder	The practice actively treats children. Only baby, säugling, kleinkind are safe.
akupunktur, tcm, massage, physiotherapie	Real services the practice sells. Never negate at account level.
stress, burnout, erschöpfung, adhs, angst	Core conditions the practice treats, heavily overlapping with sleep.
erfahrungen, bewertungen, test	Mid-funnel researchers. The practice has a testimonials page built for exactly these people.
natürlich, alternativ, sanft	The whole drug-free positioning.
preis, kosten, krankenkasse	Caution, not negative. These are commercially interested buyers. No prices are published, so they may bounce — monitor in the search-term report for 30 days before deciding.

SECTION 08

Conversion Goal & Lead Tracking

THE CONSTRAINT THAT SHAPES EVERYTHING BELOW

Appointment *completion* is not trackable on this site. AVWF has no online booking; every real appointment is arranged by phone or email and confirmed offline. The campaign therefore optimises toward **contact intent**, used as a proxy for a booked appointment.

8.1 Primary conversions — these drive bidding

#	CONVERSION ACTION	SOURCE	CATEGORY	COUNT	WINDOW	VALUE
1	Kontaktformular abgeschickt Wix footer form success	Website	Submit lead form	One	30 days	CHF 150
2	Telefon-Klick Website any tel: link	Website	Contact	One	1 day	CHF 150
3	Anruf über Anzeige call asset, ≥ 60 seconds	Calls from ads	Phone call lead	One	30 days	CHF 200

All three belong to a single conversion goal group named **Terminanfrage**, set as the campaign's only bidding goal.

THE SINGLE MOST IMPORTANT SETTING IN THIS DOCUMENT

Set the call-conversion threshold to 60 seconds. A 15-second call is a wrong number or a hang-up. Sixty seconds means a real conversation started. Because booking an AVWF appointment *is* a phone conversation, this one setting is what separates a campaign optimised for qualified leads from one optimised for noise.

8.2 Secondary conversions — observe only, never bid on

#	ACTION	WHY IT STAYS SECONDARY
4	E-Mail-Klick (mailto:)	Genuine intent, but you cannot see whether the email was actually sent.
5	Buchungsseite besucht (/online-buchen)	Intent signal, but a dead end for AVWF. Useful diagnostic: high count here with low primary count confirms the booking-page problem.
6	Klick auf externe Buchung (app.healthadvisor.ch)	Relevant only for other therapies; tracks cross-sell.
7	Engagierte Sitzung (75 % scroll or 60 s)	Quality diagnostic only. Bid on this and Google will happily buy a thousand scrollers.

8.3 Avoiding duplicate and inflated conversions

1. **Set "Count: One" on every lead action.** The default is "Every", which counts three conversions if someone taps the phone number three times. This is the single most common cause of inflated healthcare conversion data.
2. **One source per action.** Either the native Google Ads tag *or* an imported GA4 key event — never both for the same thing. Recommended: native Google Ads tags via GTM for primary actions, GA4 for analysis only.
3. **Turn off Wix's built-in Google Ads conversion tracking** if anyone has enabled it under Marketing Integrations. Two systems firing on the same form doubles every number.
4. **Accept one small overlap.** Someone who clicks tel: on the site *and* calls from the ad can fire both actions 2 and 3. "Count: One" plus a 1-day window on action 2 keeps this to a rounding error. Do not over-engineer it.
5. **Untick account-default goals** at campaign level so no legacy conversion action bleeds into bidding.

8.4 Tracking implementation checklist

VERIFIED STARTING POINT

Google Tag Manager container **GTM-N2ZQGM8R** is already live on the landing page (confirmed in the page source). No hard-coded GA4 or Google Ads tag was found, meaning they either fire inside GTM or do not yet exist. **First job: open GTM and check what the container actually contains.** The site runs on Wix Studio.

WHAT TO TRACK	TRIGGER IN GTM	NOTES
Prerequisite	—	Google Ads → Admin → Account settings → Auto-tagging ON . Nothing works without gclid.
Base tags	All Pages	Google tag (GA4) + Conversion Linker. Enable built-in variables: Click URL, Click Text, Click Element, Page Path.
Contact form submit	Custom Event on the Wix wixFormSubmit dataLayer event <i>if it fires</i> ; otherwise Element Visibility on the success message (CSS selector, once per page, 50 % visible)	Wix forms do not reliably fire gtm.formSubmit. Element Visibility is the robust fallback. Requires the form to show a visible success message — verify with a test submission.
Phone click	Click – Just Links, Click URL starts with tel:	Covers all three tel: links on the page.
Calls from ads	Not a GTM job	Google Ads → Assets → Call asset → enable Call reporting . Then Goals → Conversions → New → Phone calls → Calls from ads → minimum 60 seconds .
Email click	Click – Just Links, Click URL starts with mailto:	Secondary.
Booking page visit	Page View, Page Path equals /online-buchen	Secondary.
Outbound booking click	Click – All Elements, Click URL contains app.healthadvisor.ch	Secondary.
GA4	—	Link GA4 ↔ Google Ads. Mark generate_lead as a Key event. Do not import it if native tags already cover the same action.
Testing	—	GTM Preview → run every action → each tag fires exactly once. Then Tag Assistant on the live URL. Then confirm Google Ads reads "Recording conversions" within 24 h. Place a real test call.

8.5 Closing the loop on lead quality

Google can tell you how many people contacted the practice. It cannot tell you how many became patients — and for a high-consideration therapy programme, that difference is the whole game.

Once a month, ask the practice two questions: how many enquiries arrived, and how many became paying patients. Divide ad spend by the second number. That figure — not the CPA in the Google Ads interface — is your true cost per patient, and it is the number that should drive every budget decision from month two onward.

Offline conversion import via gclid would automate this, but it requires a CRM the practice does not appear to have. Do not attempt it in month one.

8.6 Realistic expectations

METRIC	EXPECTED RANGE	NOTE
Average CPC	CHF 2.50 – 5.00	Estimate for Swiss local healthcare search. Verify in week 1.

Clicks per day at CHF 40	8 – 15	Follows from the above.
CTR	4 – 8 %	Below 3 % after 500 impressions signals a keyword-to-ad mismatch.
Conversion rate	3 – 8 %	Below 2 % with healthy CTR means the landing page is the bottleneck, not the ads.
Cost per Terminanfrage	CHF 80 – 120	Judge against the actual value of one AVWF patient — ask the practice.

These are planning estimates based on market norms, not guarantees. Replace them with your own data after 30 days.

SECTION 09

Campaign Assets

Add all assets at **campaign level** so both ad groups inherit them. Every destination below was verified live (HTTP 200) on 17.09.2026.

9.1 Sitelinks

LINK TEXT	CH	DESCRIPTION LINE 1	DESCRIPTION LINE 2	FINAL URL
Erfahrungsberichte	18	Berichte unserer Patienten	zu Schlaf, Stress und Energie	/avwf-bewertungen
Häufige Fragen (FAQ)	20	Antworten zu Ablauf, AVWF	Therapie und Praxis in Zürich	/faq
Praxis am Stauffacher	21	Zentral am Stauffacher	Kanzleistrasse 4, 8004 Zürich	/die-praxis
AVWF für Erwachsene	19	AVWF bei Stress, Schlaf, ADHS	Für Erwachsene in Zürich	/avwf-erwachsene
AVWF Wissenschaft	17	Fachartikel zur AVWF Methode	Hintergrund und Fachartikel	/avwf-wissenschaft

All link text ≤ 25 characters, all description lines ≤ 35 characters — verified. A **"Termin & Kontakt" sitelink to /online-buchen is deliberately omitted** until AVWF has a working booking option there; sending a booking-intent click to a page with no booking option for this service would be a poor experience.

9.2 Callouts

Kostenloses Erstgespräch Praxis am Stauffacher Medikamentenfrei Nicht invasiv AVWF Neurostimulation Persönliche Beratung	Drei Therapiepakete Programm für zu Hause Individuelles Programm Zentral in Zürich Ohne Schlafmittel Erwachsene & Kinder
---	---

All ≤ 25 characters — verified. Each traces to page wording: *kostenloses Erstgespräch · am Stauffacher · nicht invasiv und medikamentenfrei · drei Pakete · für zu Hause · individuelles Schlaf-Therapieprogramm · beraten wir Sie gerne persönlich · arbeitet nicht mit Schlafmitteln.*

Excluded on purpose: "Von Krankenkassen anerkannt" (unverified), "20 Jahre Erfahrung" (on /avwf, not this page — confirm first), "Beste Praxis Zürich" (superlative).

9.3 Structured snippets — run both

HEADER	VALUES
Dienstleistungen	AVWF Neurostimulation · Neurofunkt. Diagnostik · Visualtraining · Farblichttherapie · Erstgespräch
Typen	AVWF Remote Self-Care · AVWF Remote Custom · AVWF Premium

All values ≤ 25 characters — verified. "Neurofunkt." is abbreviated because "Neurofunktionelle Diagnostik" exceeds the limit. Do not add Physiotherapie, TCM or Longevity — real services, but irrelevant to a sleep searcher and they dilute ad relevance.

9.4 Other assets

ASSET	PRIORITY	SETUP
Call asset	CRITICAL	+41 43 322 22 00, Switzerland. Call reporting ON. Conversion at 60 s. Schedule to practice opening hours. This is the primary booking channel for AVWF.

Location asset	CRITICAL	Link the Google Business Profile. Shows address, distance and map pin — the strongest local signal available. <i>Prerequisite: GBP must exist, be verified and be linked.</i>
Image assets	HIGH	Three real photos: practice interior/exterior at Stauffacher; Martin Beer portrait (already on the site); the AVWF therapy headphone setup. Upload each in 1:1 (min 1200×1200) and 1.91:1 (min 1200×628). No text overlay, no logo, no collage — Google rejects those.
Business name + logo	MEDIUM	Business name "House of Rouh". Logo square 1:1, min 128×128.
Lead form asset	SKIP	Bypasses the landing page entirely, and with it the Erstgespräch framing that qualifies the lead. Known to produce low-quality leads for high-ticket therapy.
Price asset	NOT POSSIBLE	No prices are published anywhere on the site.
Promotion asset	SKIP	No promotions, and discounting invites policy trouble in a health context.
Automated assets	TURN OFF	Assets → three-dot menu → Automated assets → Advanced settings. Google auto-generates headlines and sitelinks from a page crawl; in a health vertical an auto-generated claim is a liability.

SECTION 10

Pre-Launch Requirements & Checklist

10.1 Landing-page fixes — blocking

These three should be done before the campaign spends money. Each is a small Wix edit with a measurable effect on lead volume.

#	FIX	EXACTLY WHAT TO DO
1	Add a CTA above the fold	The hero currently holds a headline, a paragraph, a practitioner card and an "E-Mail schreiben" link. Add a primary button directly under the intro paragraph: "Kostenloses Erstgespräch vereinbaren" anchored to the contact form (#kontakt), plus a secondary "Anrufen" button wired to tel:+4143322200. On mobile, stack both full-width. This is the highest-leverage change available.
2	Fix the booking dead end	On /online-buchen, the AVWF block offers only an email link while four other therapies have working "Online buchen" buttons. Either add online booking for AVWF, or replace that block with a clear "Termin telefonisch vereinbaren" button plus "E-Mail schreiben". Twenty-minute edit; removes the worst friction point in the funnel.
3	Add a mid-page CTA	The copy's natural close is <i>"Nehmen Sie mit uns Kontakt auf, wir sind für Sie da."</i> — put a button there. Repeat one immediately after "Unsere Therapiepakete", where the visitor has just chosen a package. Button text: "Jetzt Erstgespräch vereinbaren" .

10.2 Landing-page fixes — strongly recommended

AREA	RECOMMENDATION
Typo	"E--Mail schreiben" has a double hyphen, on this page and on /online-buchen. Fix to "E-Mail schreiben". Small, but on a health page a stranger is deciding whether to trust, sloppiness reads as risk.
Form friction	Five required fields, including a mandatory free-text "Nachricht". Make Nachricht optional and change the button from "Nachricht senden" to "Kostenloses Erstgespräch anfragen" .
Meta description	The page has none (verified). Add: <i>"Schlafstörungen in Zürich behandeln – AVWF® Neurostimulation, nicht invasiv und medikamentenfrei. Kostenloses Erstgespräch in der Praxis am Stauffacher."</i>
Headline match	The H1 reads only "Schlafstörungen" while the ads promise treatment <i>in Zürich</i> . Add the location to the sub-headline: <i>"Schlafstörungen behandeln in Zürich – endlich wieder durchschlafen."</i>
Trust block	Pull two sleep-relevant quotes from /avwf-bewertungen and place them visibly under "Die Wirkung". Add Google review rating and count if the practice has them.
Local relevance	Address appears only in the footer. Add "Kanzleistrasse 4, 8004 Zürich – am Stauffacher" to the hero, plus one line on tram/S-Bahn access.
Opening hours	Not published anywhere. Add them — it is the second question after price, it fixes the call-asset schedule, and it feeds the Google Business Profile.
Page speed	The page delivers a 2.07 MB HTML payload. Server response measured fast (TTFB 0.2–0.6 s), but server speed is not user speed. Run PageSpeed Insights on the mobile tab for this exact URL and record LCP. Above 2.5 s, compress the hero image and lazy-load below the fold. Measure; do not guess.
Mobile test	On a real phone, confirm: the phone number is tappable, form fields need no zoom, the new CTA is visible without scrolling, and the phone field accepts a Swiss number without fighting the country-code dropdown.

10.3 Open items requiring client input

QUESTION	WHY IT MATTERS
Practice opening hours?	Required to schedule the call asset. Without it, ads generate calls nobody answers.
Is the therapy covered by any Krankenkasse / Zusatzversicherung?	The FAQ answer is loaded dynamically and could not be read. This is the number-one unanswered objection for Swiss healthcare buyers, and it determines whether "krankenkasse" should be a negative or a keyword.
Does "20 Jahre Erfahrung und tausende Patienten" apply to this practice entity?	It appears on /avwf but not on the sleep page. Confirmation unlocks a strong trust callout and headline.
Is there a verified Google Business Profile, linked to the Ads account?	Required for the location asset — one of the two critical assets for local intent.
What is one AVWF patient worth?	Sets the conversion value and, from month two, every budget decision.

10.4 Pre-launch QA checklist

CAMPAIGN SETTINGS

- ☐ Location = Zürich (City) only — no Canton, no "Switzerland"
- ☐ Location option = Presence, not "Presence or interest"
- ☐ Language = German + English
- ☐ Search Network only — Search Partners OFF, Display OFF
- ☐ Daily budget = CHF 40
- ☐ Bidding = Maximize Clicks, CHF 4.00 max CPC cap
- ☐ Campaign-specific goal = only "Terminanfrage"
- ☐ Auto-apply recommendations = OFF
- ☐ Ad rotation = Optimize
- ☐ Final URL suffix pasted and page loads correctly with it

ADS

- ☐ Four RSAs live (2 per ad group)
- ☐ All headlines ≤ 30 characters — verified
- ☐ All descriptions ≤ 90 characters — verified
- ☐ No phone number in any headline, description or sitelink description
- ☐ No unsupported claims — no cure, guarantee, superlative, price or insurance claim
- ☐ Ads 1A and 2A: headlines 1–3 pinned to Position 1
- ☐ Ads 1B and 2B: no pinning
- ☐ Ad Strength at least "Good" on all four
- ☐ Display paths set

KEYWORDS

- ☐ Both ad groups' keywords added
- ☐ No broad match anywhere
- ☐ Match-type brackets and quotes pasted correctly
- ☐ Shared negative list created and applied to the campaign
- ☐ Ad-group routing negatives added to both ad groups
- ☐ Confirmed *kostenlos*, *gratis*, *medikamente*, *schlafmittel*, *kinder*, *akupunktur* are NOT in the negatives

ASSETS

- ☐ 5 sitelinks added, all URLs load
- ☐ 12 callouts added
- ☐ 2 structured snippets added
- ☐ Call asset added, call reporting ON, 60 s threshold
- ☐ Call asset scheduled to opening hours
- ☐ 3 images in both 1:1 and 1.91:1
- ☐ Business name and logo added
- ☐ Location asset linked
- ☐ Automated assets turned OFF

TRACKING

- ☐ Auto-tagging ON
- ☐ GTM container confirmed loading on the live page
- ☐ Form conversion tested — fires exactly once
- ☐ Phone-click conversion tested on a real mobile device
- ☐ Booking-page and mailto conversions tested
- ☐ Wix native Google Ads tracking confirmed OFF
- ☐ All lead actions set to Count: One
- ☐ Primary / Secondary assignments correct
- ☐ GA4 linked; no duplicate imported key events
- ☐ Real test call placed and recorded

OPEN ITEMS

- ☐ Opening hours obtained
- ☐ Insurance status confirmed
- ☐ "20 Jahre Erfahrung" confirmed or dropped
- ☐ Google Business Profile verified and linked
- ☐ Patient value established

- ☐ **Campaign ready to launch**

LANDING PAGE

- ☐ Above-the-fold CTA added
- ☐ Booking dead end fixed
- ☐ Mid-page CTA added
- ☐ "E--Mail schreiben" typo fixed
- ☐ Form shows a visible success message
- ☐ Tested on a real phone
- ☐ PageSpeed Insights mobile test run and LCP recorded
- ☐ Final URL tested with UTM suffix

APPENDIX

Copy-Paste Build Blocks

Everything below is ready to paste directly into the Google Ads interface. Match types are encoded in the brackets and quotes — paste them exactly as written; retyping them risks silently converting keywords to broad match.

AD GROUP 1 — KEYWORDS

QUALITY ASSURANCE PERFORMED ON THIS PLAN

- Landing page and all linked pages fetched and parsed live on 17.09.2026. All German wording quoted verbatim from the page source.
- All 30 headlines, 8 descriptions, 5 sitelinks, 12 callouts and 8 structured-snippet values **character-counted programmatically**. Zero limit violations.
- All ad text, sitelink text and sitelink descriptions **scanned for phone numbers**, which Google editorial policy prohibits in ad text. Zero violations.
- All five sitelink destinations verified live (HTTP 200). /kontakt and /preise return 404 and were excluded rather than invented.
- Every claim in every asset traces to a sentence on the landing page or a linked page. Claims sourced from a linked page rather than the sleep page itself are flagged for confirmation in Section 10.3.
- No medical claims, guarantees, superlatives, prices or insurance statements appear anywhere in the customer-facing copy.
