

Sound more **American**, stay you.

A practical guide for re-recording the SK Mahbub server-side tracking video (SCENE_01-09). The goal is a clearer, more American delivery, roughly halfway: your voice and tone, with US pronunciation on the words that matter. Focus on the 6 habits below; they make most of the difference.

01

Say every "r"

Americans pronounce the r after vowels. Curl the tongue slightly back.

server = SUR-vur · more = MOR · sure = SHUR

02

Soft "t" between vowels

A t between two vowel sounds becomes a quick, light "d".

data = DAY-duh · better = BED-er · Meta = MEH-duh

03

Wide "a" as in "cat"

Open the mouth wide and flat for these words.

ad · can't · campaigns · tracking · actually

04

"o" often sounds like "ah"

Many short o's are an open "ah" in US English.

optimize = AHP-tuh-myz · TikTok = TIK-tahk · not = NAHT

05

Stress one word, relax the rest

Hit the key word in each phrase, and let small words (to, the, a, and) go quick and soft.

"you're LOSING MONEY" · "a SERVER"

06

Link words together

Flow words into each other, and use contractions.

tracking_is · they're · can't · you're · don't

● KEY WORDS IN YOUR SCRIPT

Capitals = the stressed syllable. Read the "Say it like" column out loud a few times before recording.

WORD	SAY IT LIKE	TIP
data	DAY-duh	Not "DAH-ta". Soft t.
tracking	TRAK-ing	Wide "a" as in cat.
server / server-side	SUR-vur / SUR-vur-syd	Both r's clearly.
conversion	kun-VUR-zhun	"zh" as in "vision".
campaigns	kam-PAYNZ	The g is silent.
optimize / optimization	AHP-tuh-myz / ahp-tuh-muh-ZAY-shun	"ah" at the start.
can't	KANT	Wide "a", not "kahnt".
privacy	PRY-vuh-see	US: "pry", not "priv".
iOS	eye-oh-ESS	Three clear letters.
processed	PRAH-sest	US: "prah", not "proh".
reporting	rih-POR-ding	r + soft t.
inaccurate	in-AK-yur-it	Stress the second syllable.
reliable	rih-LY-uh-buĽ	Stress "LY".
analytics	an-uh-LID-iks	Soft t, stress "LID".
infrastructure	IN-fruh-struk-chur	Stress the first syllable.
dependable	dih-PEN-duh-buĽ	Stress "PEN".
Google · Meta · TikTok	GOO-guĽ · MEH-duh · TIK-tahk	Brand names as Americans say them.
actually	AK-choo-uh-lee	Wide "a", "ch" sound.
wasted / wasting	WAY-stid / WAY-sting	Long "ay".
costing	KAW-sting	Open "aw".
valuable	VAL-yuh-buĽ	Three quick syllables.

● YOUR SCRIPT, MARKED UP

Bold = stress this word / = short pause // = longer pause Grey line = how the tricky words sound

SCENE_01 • HOOK

Curious, direct. Rising tone on both questions.

Running **Facebook** or **Google Ads**? // But are you **sure** / every **lead** and **purchase** / is **actually** being tracked?

G00-guL ADZ • SHUR • LEED • PUR-chis • AK-choo-uh-lee • TRAKT

SCENE_02 • PROBLEM

Calm, matter-of-fact. Small beat after "not".

Because **often**, / they're **not**. // **iOS** privacy updates, / ad **blockers**, / browser **restrictions**, / and tracking **issues** / can cause valuable conversion data / to get **lost**.

AW-fun • NAHT • eye-oh-ESS PRY-vuh-see • BRAH-kurz • BROW-zur rih-STRIK-shunz • IH-shooz • DAY-duh

SCENE_03 • WHY IT MATTERS

Building concern. Slightly slower on the last three items.

And when your ad platforms **don't** receive the **right** data, / your campaigns **can't** optimize properly. // That means / **inaccurate** reporting, / **weaker** optimization, / and **wasted** ad spend.

AD PLAT-formz • rih-SEEV • kam-PAYNZ KANT AHP-tuh-myz PRAH-pur-lee • in-AK-yur-it rih-POR-ding • WEE-kur • WAY-stid AD SPEND

SCENE_04 • SOLUTION

Confident, slower. This is the turning point.

This is where / **server-side** tracking / comes **in**.

SUR-vur-syd TRAK-ing

SCENE_05 • HOW IT WORKS

Clear, explanatory. Even list rhythm on the platforms.

Your conversion data / is processed through a **server** / before being sent to platforms like **Google**, / **Meta**, / and **TikTok**.

kun-VUR-zhun DAY-duh • PRAH-sest THROO uh SUR-vur • G00-guL • MEH-duh • TIK-tahk

SCENE_06 • BENEFITS

Positive, satisfied. Three separate beats.

The **result**: // more **reliable** tracking. / Less data **loss**. / **Better** signals for your campaigns.

rih-ZULT • MOR rih-LY-uh-bul • LESS DAY-duh LAWSS • BED-ur SIG-nulz

SCENE_07 • INTRODUCTION

Warm, friendly, a light smile in the voice. Say your name your way.

Hi, this is **SK Mahbub**. // I'm a **Paid Ads**, / **Web Analytics** / and **Conversion Tracking** consultant. // We build and implement **server-side** tracking solutions / to make your conversion data **more reliable** / and your advertising infrastructure **more dependable**.

ESS-KAY (your name, unchanged) • an-uh-LID-iks • kun-SUL-tunt • IM-pluh-ment • suh-L00-shunz • AD-vur-ty-zing IN-fruh-struk-chur • dih-PEN-duh-bul

SCENE_08 • THE REAL COST

Serious and lower. Take a full breath at "/" before "You're losing money".

Because when your tracking is **wrong**, / you're not just **missing data**. // You're **losing money** / and **wasting** ad spend.

RAWNG • MISS-ing DAY-duh • L00-zing MUH-nee • WAY-sting AD SPEND

SCENE_09 • CTA

Calm authority. Land the last line slowly and with a falling tone.

So **before** you scale your campaigns, / make sure your tracking is **actually working**. // **Fix** your tracking / before it starts **costing you more**.

bih-FOR • SKAYL • kam-PAYNZ • AK-choo-uh-lee WUR-king • FIKS • KAW-sting yoo MOR

Recording setup

- One file per scene: SCENE_01 ... SCENE_09
- Quiet room with soft furnishings; no fan or AC
- Phone or mic 15–20 cm from your mouth, slightly off to the side
- Leave ~1 second of silence before and after each take
- Same place and distance for every scene

Practice routine (10 min)

- Search "how to pronounce data" on Google and play the US audio; do the same for the words in the table
- Read each scene out loud 3 times before recording
- Record 2–3 takes per scene and send the best one
- Keep your normal pace; a natural smile helps scene 07
- Don't force it. Clear and relaxed beats a fake accent

When you're done: upload the 9 new files here. I'll clean them up with the same chain (no voice change), re-time every animation to your new delivery, and re-render the 16:9 light version.
