Master Video Editing Prompt

SK Mahbub | Reusable editing system for every video

How to use

1. Fill in section 9 ("This video") inside the box.
2. Copy everything inside the box.
3. Paste it together with your video link (Google Drive set to "Anyone with the link").

Brand colors at a glance

Color	Code	Name	Used for
	#FFFFFF	White	Top of canvas backgrounds
	#F6FBF9	Light mint (main brand)	Middle of canvas backgrounds
	#E6F3EE	Deeper mint	Bottom of canvas backgrounds
	#172B26	Deep forest green	Text on light backgrounds
	#0D9488	Teal	Checkmarks, highlights
	#2563EB	Blue	Numbers and data (sparingly)

The prompt: copy everything in the box

MASTER EDITING PROMPT: SK MAHBUB

Edit my uploaded video in the same style as my approved final edited video. Keep the style exactly the same. Only change the content-specific parts listed in section 9.

1. My footage and voice

- Keep my original footage, face, voice and message.
- Do not use AI faces or change my appearance or skin tone.
- Keep lip sync natural and my voice clear.

2. Brand colors

- **Background top:** #FFFFFF (white)
- **Main brand color:** #F6FBF9 (light mint)
- **Background bottom:** #E6F3EE (deeper mint)
- **Text on light backgrounds:** #172B26 (deep forest green)
- **Checkmarks and highlights:** #0D9488 (teal)
- **Numbers and data, use sparingly:** #2563EB (blue)

3. Two visual styles: never mix them

On my footage (face to camera):

- Clean white text with no background panel.
- Regular-weight supporting words, plus larger bold keywords.
- Captions never cover my face.
- No glass effects and no grid.

On blank branded canvas scenes:

- White-to-mint gradient: #FFFFFF to #F6FBF9 to #E6F3EE.
- Subtle, slowly moving grid.
- Frosted-glass cards allowed here only.
- Deep forest green text with teal accents.

4. Text animation

- Smooth fade-in and fade-out, with slight upward movement.
- Word-by-word text reveals.
- Gentle scale-in for important keywords.
- Subtle zoom-in on important statements, then a smooth zoom-out.
- No bouncing, shaking or over-animation.

5. Sound design (required)

- My voice is always the clearest and loudest sound.
- Add sound effects for keywords, numbers, zooms and scene transitions.
- Use soft whooshes, clicks, soft impacts and risers.
- Time every sound effect exactly with its animation.
- Background music is optional, quiet, and never competes with my voice.

- No random or excessive sound effects.

6. Content

- Understand what I am saying before editing.
- Emphasize the key message, statistics, questions and important statements.
- Use numbers, charts or icons only when they help explain the point.
- Do not reuse graphics from old videos if they do not fit the new topic.

7. Color grading and transitions

- Natural skin tones, balanced contrast, not oversaturated.
- Smooth, purposeful transitions between footage and canvas scenes.

8. Pacing and ending

- Keep my story in its original order.
- Remove dead pauses, but never cut important words.
- No logos, editing credits, watermarks or outros.
- End cleanly on my last line.

9. This video (fill in each time)

Topic: _____

Key message: _____

Keywords to emphasize: _____

Animation changes: _____

Sound changes: _____

Special visuals (numbers, charts, graphics): _____

Other instructions: _____

If a field is left blank, follow the master style and decide based on the content.

10. Before delivering, check

☐ My footage and voice are intact.
☐ Captions use the approved white typography on footage.
☐ Glass and grid appear only on canvas scenes.
☐ The right keywords are emphasized.
☐ Sound effects match the animations.
☐ My voice is clear and the audio is balanced.
☐ Brand colors are consistent.
☐ Visuals fit this video's topic.
☐ No extra branding, credits or unrelated elements.

Rule: change the content, not the style.
